## Foreign News.

CURIOSITIES OF LEXICOGRAPHY .- The number of pards defined in the vocabulary proper of Webster's Dictionary, is said to be 99,000. In addition to these, These with the Geographical, Scriptural, and Proper games, make a total of nearly 8,000 more words in Webster than in any other English Dictionary.

LIOYD'S WEEKLY LONDON NEWSPAPER -Edited by Tropic. Blanchard Jerrold, averages a weekly sale of 195,000 It was established in 1843, and contains sixty columns of the most varied and interesting intelligence; printed by Hoe's Fast American Printing Machine, at the rate of 15,000 copies per hour, thereby enabling the publication of news to the latest moment, (much later than any other newspaper.)

LADY FRANKLIN TO VISIT CALIFORNIA. - The noble widow of Sir John Franklin arrived in New York on Saturday last, and will, after a visit to Boston and other Eastern cities, proceed to the Pacific, and probably take up her winter residence in San Francisco. to which she is advised by her physicians. Though in general good health, a mild climate is necessary to her, and therefore San Francisco has been wisely recommended. Lady Franklin is now 60 years of age. EARLY VICE.-Lord Shaftsbury recently stated as the result of his personal investigation, that " of all the adult male criminals in London, not two in a handred who lived an honest life up to the age of 20, afterward entered upon a course of crime," and that "almost all who enter upon such a course, do so be-

gious instruction. The Mariposa Gazette says, that in Mariposa county, two "ugly ladies" are required as school teach-It will be necessary for each to prove that she is more than thirty-five years of age. If they are young and pretty, says the Gazette, they will be chasel from pillar to post, by the masculine persuasion, and a woman can't be courted and keep school

tween the ages of 8 and 16." Oh, the necessity of

family discipline ! Oh, the blessedness of early reli-

METTON AS AN ARTICLE OF FOOD .- We mean to has some effect upon our countrymen, that a pound of lean, tender, juicy mutton can be produced for and can do more work with greater ease to themselves than those who eat fat pork. We know nothing more delicious than smoked mutton hamsof the Southdown breel of sheep. Venison itself is not more delicious. -Am. Agriculturist.

Persons.-Considerable attention was attracted to for after awhile they turned to the northward, and took flight, perhaps for the more prolific waters of Oregon and Washington Territory .- Alta Cal.

City railrowls having proved so successful in the United States, they are about adopting them in England. The first one is to be built in Birkenhead, opposite Liverpool, and the contract for building the road has been given to a Bostonian. All the great cities of Europe must soon adopt this means of locomotion, the cheapest and best yet found for common roads. It will not be long before London must follow the example of her sister city.

THE LAST OF THE POPES .- The Cathedral at Simena in Italy, has niches in which are placed busts of the remains to be filled; the popular belief therefore is that the reigning Pope will be last of his race. It is recorded that the Doges of Venice ceased when the niches for their statues were filled. The Viceroys of Peru had their pictures framed in a public building. When the last panel was filled, the form of government suddenly changed.

POVERTY .- Over four hundred clergymen of the Episcopal church of England are in great pecuniary distress, and the secretary of the Poor Clergy Relief Fund has put forth a circular containing some sor-rowful statements. He says, on the 3d of January, 1860, a clergyman wrote him thus: "I am of twentyave years' standing, and for that period have only received an average income of £44 per annum. I am a curate in sole charge, with a population of 12,000. I have struggled on till I can struggle no longer, without the cause of our beloved church suffering through my deep poverty and inability to obtain even the necessaries of life, as you will readily believe, when I tell you that within the last three months ! have been wearing a coat in rags."

Poor Mexico.—General Bickley has published an address to the Knights of the Golden Circle in Virginia and other Southern States. They are ordered to repair to their encampment in Texas by the 15th of September. He says, the citizens of Texas have raised money and material to the amount of \$498,-000, and appeals to her sister Southern States for contributions. The object is declared to be to Amerkanize and Southernize Mexico, looking to the establishment of a Southern Confederacy. Such a course is to be taken as will not violate the neutrality laws, the Knights going into Mexico as emigrants, and becoming bona fide citizens, under, it is said, Mexican sanction. The order is represented to number

50,000 members. Poison that is Sold for Genuine Spirits.—The "Oil of Bourbon Whiskey" is openly advertised for sale by chemists at fifty cents per ounce, and this oil is so potent that "each ounce will change one hundred gallons of alcohol into 'delicate old Bourbon!" In like manner "Oil of Jamaica,"

JUST RECEIVED PER "RADUGA."

THERCES BOSTON SUGAR-CURED HAMS Carolina Rice,

Half barrels superior Dried Apples, and "Oil of Apple" are sold to convert a common spirit into Jamaica ditto, and into "Apple Brandy!" As to "Oil of Cognac" (which is a composition of sulphuric acid, caustic potash, and highly concentra-tel alcohol) one ounce of it is worth six dollars, and will metamorphose a hundred gallons of neutral spirits into "Pure old Cognac Brandy just out of the Custom House,"

Матноризм.--Wesleyan Methodism is one of the wonders of the age and world. It numbers two millions of communicants in America, and seven hundred thousand in England. The increase of its membership in England during the past ecclesiastical year, was fifteen thousand four hundred and sixtynine full members, and twenty-six thousand seven hundred and forty-six remain on trial. The candidates for the ministry are more numerous than in any former year. The missionary collections for the year amount to \$700,000.

THE MUSICAL WATERS .- The mystic music sometimes heard at the mouth of the Pascagoula river (between New Orleans and Mobile,) on a still night, is one of the wonders of the coast. It is not confined, however, to the Pascagoula river, but has often been hearl at other places. At the mouth of the Bayou Coq. de l'Inde and other inlets opening into the Gulf along the coast, the curious listener, when every other sound is hushed, may sometimes hear its strains coming apparently from beneath the waters, like the soft notes of distant Eclian harps. It is generally supposed that this phenomenon, whatever its origin might be, natural or supernatural, was peculiar to our own coast. It appears, however, from Sir Emerson Tenant's recent work on Ceylon, something very like it is known at Battialon, in that island, and it is attributed to rather less poetical and mysterious rigin-that it is a peculiar species of shell fish. They are said to be heard at night, and most distinetly when the moon is nearest its full.

POLITE DUNNING .- A gentleman who has been dunned by the proprietors of the Home Journal, puts on record his admiration of the polite way in which Willis does it. The following is the amiable circular of the poet-editor :

"DEAR SIR-In the hurry of your engagements, you have doubtless overlooked and forgotten, as a rifle, the small sum of a year's indebtedness to the Home Journal; but as rivers are kept running by drops of falling dew, so it is necessary to our continnance that the falling dues should come punctually to the fountain-head. By dropping your due into the post-office for us, you will oblige," &c.

A milking machine is among the latest inventions. It is on the principle of an air-pump suction, is attached to a poil, and set on a stool under the udder, the four tests inserted in four tubes, and the pump operated, and the milk drawn and conveyed by a

conductor into the pail, the inventor says in a remarkably short time ; say three minutes for an ordinary cow; milking entirely clean, and without injury to the cow. The manner of its construction is simple ugh. It consists of two diaphragm pumps, made of tin and India rubber, so arranged as to be easily taken apart for washing. The teat-cups are made tapering to fit any size, and attached by flexible joints. to as to spread apart to suit wide-spreading teats, or those more contracted. PRINCE NAPOLEON AND PRINCESS CLOTILDE .- It was in accordance with the wishes of the Prince

acceeds to the income of a million of fee. another fine show, such an one as has not been wit- Job Work executed in the most workmanlike manner. succeeds to the income of a million of france a year, which the Emperor apportioned as the dotation of the Prince Jerome. As it is said there is a prospect, at tist, of the Princess Clotilde, after nearly two years marriage-well, no matter. It is probable that the household expenses of the Prince will be increased, ere long, by the addition of another member, and an expense of four or five dollars, as Mr. S. will set them up in he will therefore have use for the money.

ORIGIN OF THE UPAN TREE STORY .- A real valley of Poison, and is filled to a considerable height with | rusalem; not only have the police harpies and furies until he feels himself sinking under the influence of 1848 are now sought out for office, not for torture Bethel Vestry, on King street. the atmosphere which surrounds him, the carbonic and imprisonment. The dungeons have given up acid, of which it chiefly consists, rising to the height to daylight captives who have lingered there ever ization. The public are invited to attend. of eighteen feet from the bottom of the valley. Birds since Mr. Gladstone's visit, a dozen years ago. Foursome 6,000 or more are defined in the Appendix. Which fly into this atmosphere drop down dead; and teen young men (now grown grey) have emerged a fowl thrown into it, dies before reaching the bot- from sepulchral durance, to which the mere fact of tom, which is strewed with carcases of various having been at college with Agesilao Milano had

A TRIBUTE TO AMERICAN MISSIONARIES .- At the late London anniversaries, the Earl of Shaftesbury paid the following tribute to the American missiona-

"I do not believe that in the whole history of missions, I do not believe that in the history of diplomacy, or in the history of any negotiations carried on between man and man, we can find anything to equal the wisdom, the soundness, and the pure evangelical truth of the body of men who constitute the American missions. I have said it twenty times before, and I will say it again, for the expression appropriately conveys my meaning-that 'they are a marvelous combination of common sense and picty.' Every man who comes in contact with these missionaries speaks in praise of them. Persons in authority, and persons in subjection, all speak in their favor; travelers speak well of them; and I know of no man who has ever been able to bring a single valid objection against that body. There they stand, tested by years, tried by their fruits; and I believe it will be found that these American missionaries have done more toward upholding truth and spreading the Gospel of Christ in the East, than any other body of men in this or any other age."

TRANS-ATLANTIC TELEGRAPHY .- The possibility of electric communication between Europe and America, is no longer matter of conjecture. The vast commercial and political importance of such communication, is also slowly beginning to be appreciated. The causes of the comparative failure of the Valentia-Newfoundland telegraphic cable, are not perfectly known. The chief difficulty with long submarine ines, has been the "retardation of the electric cur-Thus, while an impression can be conveyed repeat a thousand times, or at least till what we say | five hundred miles in one third of a second, it requires nine seconds for the electric fluid to act through a perfectly insulated line of two thousand miles. The half the cost of the same quantity of pork; that it is wire, in the latter case, becomes charged, like a Leyinfinitely healthier food, especially in the summer | den jar, and all manipulating instruments yet in season, and those who eat it, become more muscular, vented, cease to operate. The North-Atlantic route, upon which Col. Shaffner is now engaged, has its proposed starting point in the north of Scotland, Thence it proceeds 225 miles to the Faroe Isles; thence 200 miles to the capital of Iceland ; thence 600 miles to the south coast of Greenland; thence 900 miles to Hamilton's Inlet on the Labrador coast. s flock of white pelicans sailing slowly around in The British war ship Bull Dog, under command of great circles over the bay, intent, apparently, on Sir L. F. M'Clintock, is now engaged in taking soundpiscatory investigations in the regions beneath them. | ings for this line; and another vessel, the steam The prospect did not seem to be particularly inviting. | yacht Fox, has been purchased, which will make examinations of the coasts and landing-places for the cables. An increasing confidence appears to be felt, in England, in regard to the early realization of this projected means of telegraphic communication between the Old and the New Worlds.

AN EXTRAORDINARY STORY .- A Mexican newspaper says, on the entrance of General Pueblita into Ayo in September last, a party of men forced their way into the Curate's house, when they heard a frightful voice proceeding from the ground, saying, "I am hungry!" This being reported, the house was examined, and in a vault, the opening of which was concealed by a stone, a woman was found who had been shut up there for eighteen years. She was tak-Popes, after their respective deaths. Only one niche en to General Pueblita's quarters. When brought into the light, where she saw a number of persons, she fainted. After she had returned to her senses a thousand questions were asked her, to which she replied only that she had been buried in the vault for eighteen years, without going out for a moment; that she had been married, and had children by her husband, but see knew nothing of their fate; that while imprisoned in the vault, she had children by the Curate, but she knew nothing of what had be-come of these children; and after saying this much and for sale low by (218-3m) CASTLE & COOKE. the Curate, but she knew nothing of what had beshe became obstinately silent. While this was passing a serjeant of the Pueblita brigade then present discovered that this was his mother and she recognized him as her son, and embraced him. The son then ran for his father, who came and recognized his wife. The husband, fifteen years ago, was imprisoned three years on the charge of having murdered his

FAIR FOR THE QUEEN'S HOSPITAL .-The Edifice in process of erection for the Queen's Hospital is rapidly advancing towards completion. The amount of funds hitherto contributed, will be nearly if not more than exhausted n erecting the same. The necessary means must be raised to furnish the building. For this purpose, Her Majesty the Queen

requests the Ladies of these islands to aid her in a FAIR, to be held on or about the 15th of November next, at the New Hospital Buildings. Notice will hereafter be given in regard to the time and place for receiving the articles contributed.

Honolulu, Sept. 6, 1860. HEALTH, STRENGTH AND HAPPINESS are obtained by cleansing the blood of its impuri we are told, on the highest authority, is the "Life," or at least the medium of Life to the Body; and it is, we know, the great feeder of every part of the frame. Thus the blood is the great channel of disease; consequently, a good or bad state of the system, or constitution, is no more or less than a good or bad state of the blood. We have made the composition of the blood our study, and are satisfied that two-thirds of all diseases are caused by its impurities.

Believing the above facts, we made ourselves acquainted with the moon chemically with a view to a reliable medicinal agent, that would correct all impurities of the blood, and at the same time effectually cure all diseases arising therefrom. We have succeeded beyond our most sanguine expectations, as with their patronage.
